

Preface to the second edition

Marian Klammer

This is the second edition of the volume that was originally published in 2014, as one of the first open access publications of Language Science Press. In less than three years, the first edition had more than 10,000 downloads, many of which in Indonesia, and downloads are still increasing. To us this demonstrates how important it is to use free open access to enable both scientists and speakers of local languages in Indonesia to read this work.

In this second edition, typographical errors have been corrected, some small textual improvements have been implemented, broken URL links repaired or removed, and maps and references updated. The overall content of the chapters has not been changed.
